

Through the lens of transparency, I wish to share with you that a support staff employee tested positive for COVID-19. This staff member had only very limited contact with students and through the direct advice of the health department, no students or staff have to be quarantined due to this situation.

Thankfully, this is a situation that did not result in quarantine for students and staff, but it does serve as a reminder that with a rising COVID-19 positive rate in our county, we must continue to be diligent with wearing our masks, washing our hands, and social distancing.

Hopefully, these strategies will help us to continue offering an in-person educational option to our students as these kids truly need to stay in school.

Thank you for your time and understanding and I hope you have a safe and healthy weekend.
